PRECISION PIVOT SYSTEM

This large capacity and compact sized machine needs relatively small space when compared to machines with the same capacity (13"). The SH-500M features hydraulic lifting of the saw frame and full stroke hydraulic vise. These features enable semi-automatic operation to securely hold the work piece, cut, and return the saw frame to a preset work height. Large, heavy-duty turning and swivel n' lock mechanism allows for up to 60 degrees of mitering capability. An excellent choice for diverse job shop needs.
